*Dementia Live: Get a glimpse of what is it like to have dementia; experience, for a few minutes, what your loved is going through daily.*

*The Impact of Dementia on Relationships is a workshop designed to assist family caregivers in understanding how dementia can affect expressions of intimacy, relationships and how to respond creatively and sensitively. Each family is impacted in a different way when dementia enters their lives. We will look at some basic facts about the changes and challenges in dementia—how some couples respond, their recommendations and issues that need to be considered.*

*All caregivers, family and friends of individuals with Alzheimer's disease or another type of dementia are welcome to join us for one or both of these **free** educational opportunities. . .*
